Dear Candidate,
We are glad to have you onboard as an <u>Intern</u> for Hackveda (India) and Hackveda Limited, Canada.

Roles and Responsibilities

1. Develop project source codes or Submit Tasks as per requirement specification

2. Test working codes / task submissions, perform unit testing, automated testing and submit a test report / presentation

3. Deploy working project on GitHub repositories or platforms recommended / provided by Hackveda Limited for live working demo or as per required specification

4. Write standard software documentation for deployment and how to use the project

5. Provide technical support to consumer in case of any errors on the existing software system

Financials

Probation period for Stipends: 2 months

Interns who may not perform well during their probation are allowed to continue their internships up-to 6 months or as desired without stipends. Evaluations for stipends will be done each month

Remuneration/Stipend: Minimum INR 5,000/- per month after successful completion of probation period

Payment Release Terms: Monthly as per performance and report evaluation

Notice period: 30 - 60 days prior or as per service due for customers, A written notice of resignation or termination of the contract should be drafted to reporting manager and Hackveda management. Please note the notice period

terms are effective from the date of joining inclusive of the probation period. In case of non-completion of Notice period: You will be liable to bear the damages. Damages will be evaluated on the basis of the service period due for customers, refunds to be initiated due to service interruption, and operational investments.

Do's and Don'ts

Interpersonal communication with other team members, customers should be done on channels authorised by Hackveda management only

Interpersonal communication to reporting manager should be done on channels authorised by Hackveda management only

Performance Evaluation and Scoring

Hackveda Limited will be monitoring attendance and progress updates
